LIGHTNING SEWER

THE NEW WILSON Oscillating Shuttle SEWING MACHINE

Is wonderful in its conception, un-precedented for doing a large range of sewing in textile fabrics and leather. Its

sewing in textile fabrics and leather. Its motions are continuous, admitting of an extraordinary rate of speed, either by steam or foot power. Every motion of the treadle makes six stitches, thus producing about one-third more work in a day than other Sewing Machines. It has no stop motions, and tightens the stitch with the needle out of the fabric. It uses the well-known Wilson Compound Feed on both sides of the needle. It has two-thirds less parts than any other first-class Sewing Machine. Its arm is fully eight and one-half inches long and five and one-half inches high, and the whole Machine is very compactly and scientifically constructed in proportions, elegance, design and appearance. Its simple, powerful and perfect mechanism places it as far in advance of all other Sewing Machines as the telephone is superior to the tin speaking tube. The WILSON MENDING ATTACHMENT, for repairing all kinds of textile fabrics WITHOUT PATCHING, furnished FREE with all WILSON SEWING MACHINES, together with a Tucker, Ruffler, Corder, Set of Hemmers, Binder, etc. Prices furnished with freight charges prepaid, and machines furnished on trial to responsible parties, to be used with steam-power, in places where we have no agents. Send for Illustrated Catalogue and Price List, No. 230.

ratters of a little more rateresting and sensational character have been coming notonous, from a political standpoint at least. An event very rare in any Congress—the expulsion of a member—threatens to shortly occur. Mr. Acklen,

of Louisiana, stands accused of a seri-ous breach of honor among members, in presenting to the House what he represented to be the report of a commit-tee, and asking to have it received and printed. These things are always accepted on the word of a member, and when it was discovered that the paper presented was not a committee report and that Mr. Acklen had no authority whatever to so represent it, there was great indignation. An investigation was ordered and the result reported places Mr. Acklen in a very bad situa-tion. He is a Democrat, but nearly every Democratic member believes he should be expelled, while on the Repubhas several very active friends who favor milder treatment. Mr. Acklen's career has been a little checkered since his election to Congress, and he has been accused of some un-manly things both here and at home, in consequence of which some newspapers have dubbed him the "Louisiana Goat," yet he has generally managed to White-wash himself. It is not known wheth-er he had any corrupt motive in the

Curtin vs. Yocum in Pennsylvania and Donnelly vs. Washburn in Minnesota, Both are practically decided. The Radical press is making a terrible howl over the finding of the sub-committee in the latter case, because they say Wash-burn's majority was 3,000. But when the report of the full committee is made, I think it will convince all fair-minded men that it is not verticen and minded men that it is not partisan and that the sitting member secured all his apparent majority by means which give him no legal or just claim to the seat. The record contains evidence of the that each voter's ballot and name on the registry should be numbered, so that it might be known how each man. Young Pruit, who was serving out a
